

Introduction

This poster explores occupational gaps by gender across Pacific Island countries. It analyzes employment numbers by sex and economic sector for clear comparisons. Visualizations highlight median and mean employment to reveal gender disparities effectively.

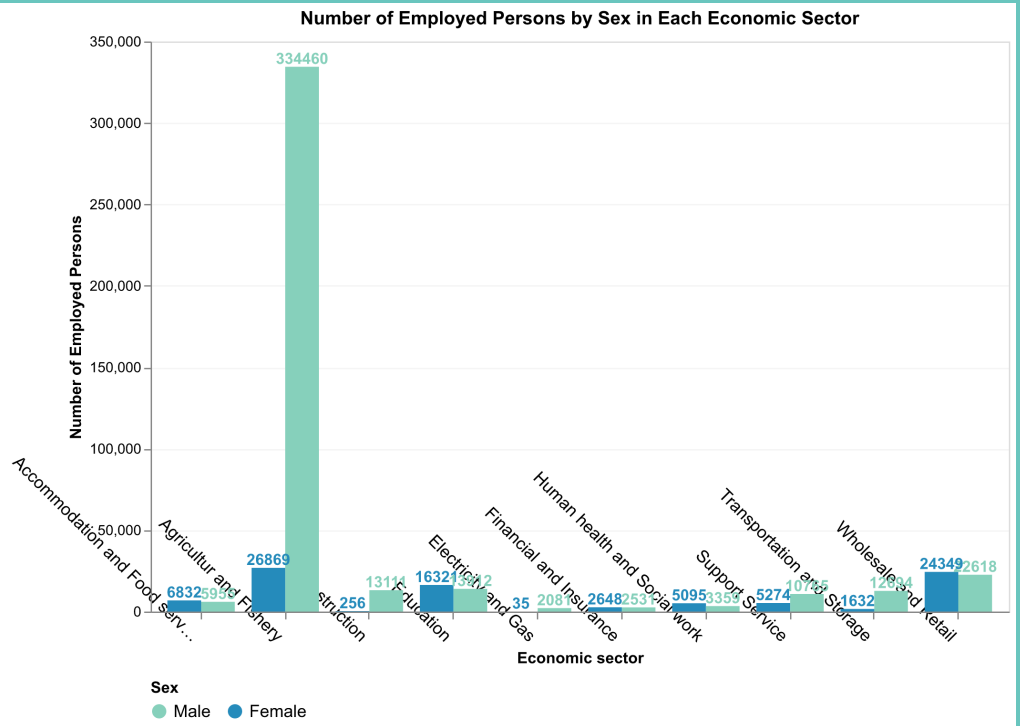

Do Gender Employment Gaps Persist Across Pacific Island Sectors?

Male employment exceeds female employment in all Pacific Island Countries, with the largest gap in the Solomon Islands.

Employment median and mean are higher for males than females; Solomon Islands and Tuvalu show the highest employment numbers.

Employment by sex varies greatly by sector; males dominate Agriculture, Construction, Transportation, females dominate Education, Wholesale and Retail. Balanced sectors exist.

Conclusion

This poster reveals consistent male employment dominance in Pacific Island Countries. Solomon Islands shows the largest gender employment gap. Median and mean employment figures are higher for males, especially in Solomon Islands and Tuvalu. Employment varies by sector: males lead in Agriculture, Construction, Transportation; females in Education, Wholesale, Retail. Some sectors exhibit gender balance. These findings highlight persistent occupational gender disparities across the region. Addressing these gaps requires targeted policies promoting balanced opportunities and inclusive economic participation for both genders.
