

## Introduction

This study explores how genre trends and budgets affect worldwide movie earnings. We analyze drama and thriller genres to understand their gross variations. The research also examines dominant genres by year and the impact of budgets on earnings.

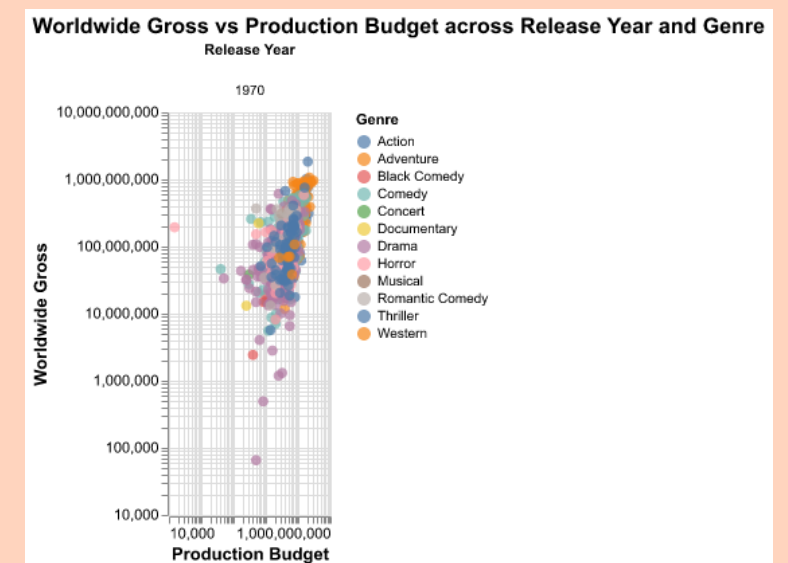

# Do Higher Budgets and Genre Drive Global Movie Earnings?

Thriller genre grosses \$280M worldwide, outperforming Drama's \$220M by \$60M.

No data points are available to determine which genres dominated Worldwide Gross in 2000 and 2004.

Worldwide Gross increases with Production Budget; Action and Adventure genres achieve highest grosses, especially above \$100 million budgets.

## Conclusion

Thriller genre earns 60 million more than Drama worldwide. Data gaps exist for 2000 and 2004 genres. Higher production budgets lead to increased worldwide gross. Action and Adventure genres excel with budgets over 100 million. Budget and genre strongly influence movie earnings trends globally.
