

# How Do Airline, City, and Class Shape Ticket Price Differences?

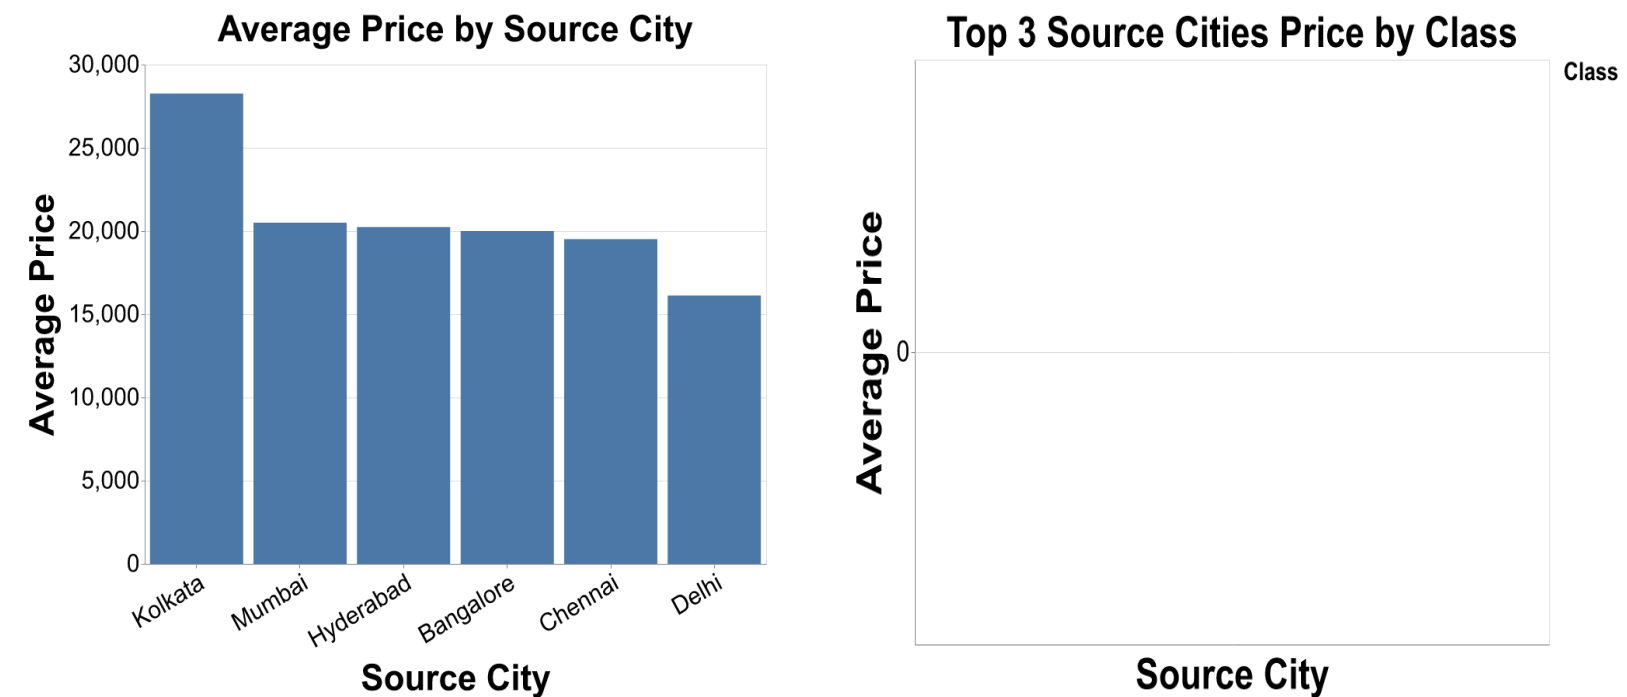

## INTRODUCTION

Airline ticket prices vary widely, with Vistara being the most expensive. This poster analyzes average prices by airline and source city using recent flight data. We explore price differences across airlines, cities, and travel classes to reveal key trends.

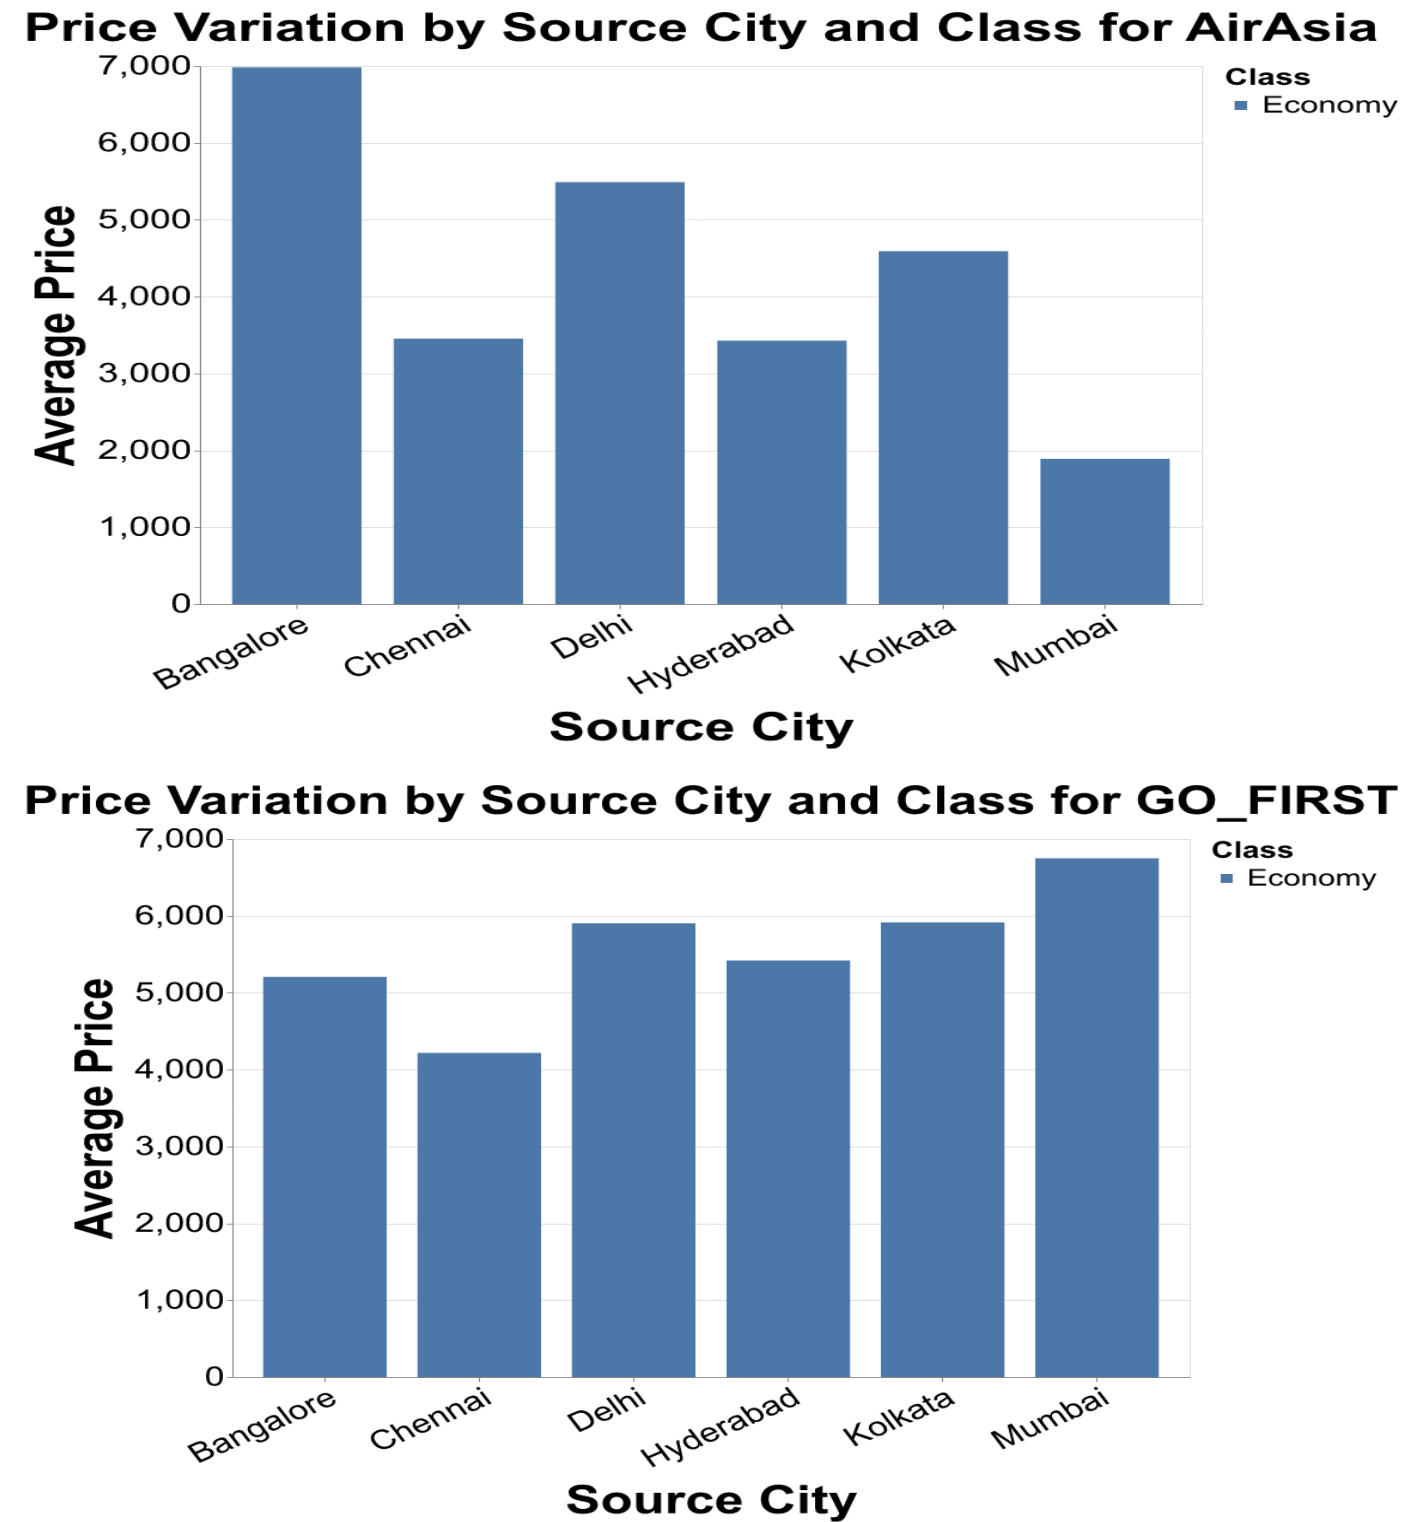

01 Airline prices vary overall, with detailed class pricing for the lowest three airlines.

02 Source cities show distinct average prices, with top three cities detailed by class.

03 Detailed price patterns by class and city for the highest and lowest ranked airlines.

## CONCLUSION

Airline ticket prices differ significantly, with Vistara as the priciest option. Source cities influence average prices, showing clear variations across locations. Travel class impacts pricing patterns within both top and bottom airlines. These trends highlight the complexity of airline pricing strategies across markets.
