

## Introduction

This study explores regional voter turnout and party support variations across the US. We analyze Democratic vote percentages in Northeast, Southeast, and other regions. Visualization charts reveal how voting patterns explain Democratic vote differences nationwide.

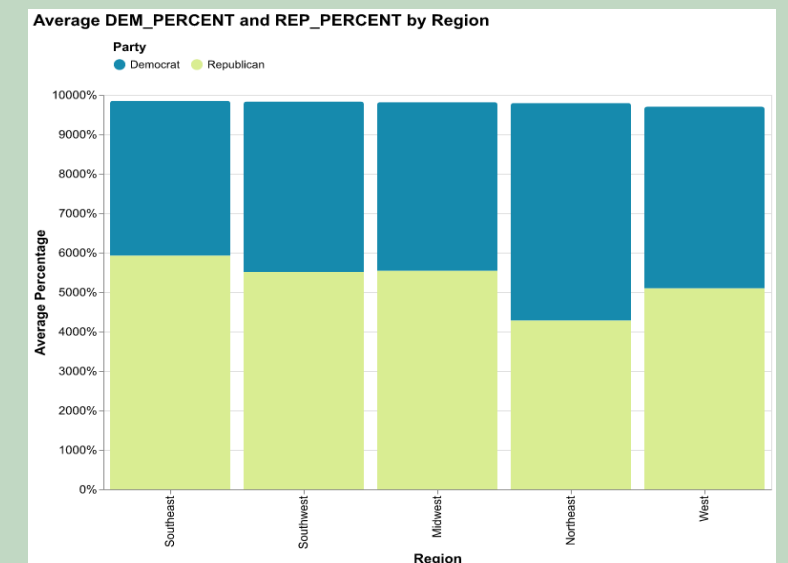

# How Do Regional Voter Turnout and Party Support Shape Democratic Vote Percentages?

DEM\_PERCENT is about 45.32% for "Other" regions; no data for Northeast or Southeast regions.

No data on TOTAL\_VOTES, DEM\_VOTES, or DEM\_PERCENT by Region is provided; no comparison can be made.

The Northeast is most Democratic; Southeast is most Republican; Midwest and Southwest are similar; West is balanced.

## Conclusion

This study reveals regional voter turnout and party support affect Democratic vote percentages. The Democratic percentage is about 45.32 in other regions but lacks data for Northeast or Southeast. Total votes and Democratic votes by region are unavailable for comparison. The Northeast shows the strongest Democratic support; the Southeast is predominantly Republican. The Midwest and Southwest have similar voting patterns, while the West is more balanced. These findings explain the variation in Democratic vote percentages across the United States, highlighting regional political dynamics and voter turnout differences.
