

How Do Region, Industry, and Gender Shape Global Billionaire Wealth Differences?

INTRODUCTION

This poster explores billionaire wealth distribution by region and industry impact globally. It highlights industry dominance and the gender gap in wealth concentration across sectors. We analyze gender and regional concentration in top industries for deeper insight. Our findings reveal key disparities in wealth by location, industry, and gender.

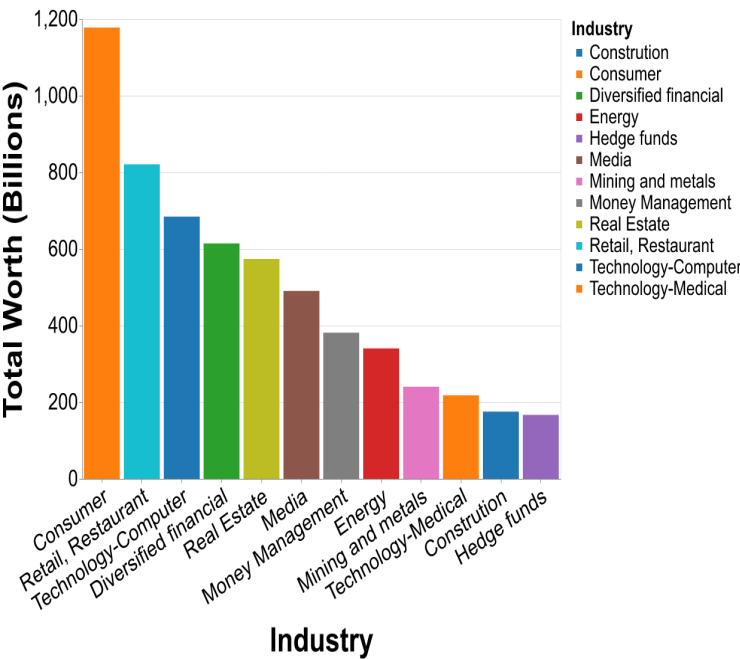

01 North America leads billionaire worth, while construction and key industries significantly shape regional wealth shares.

Billionaire Worth Comparison Across Regions

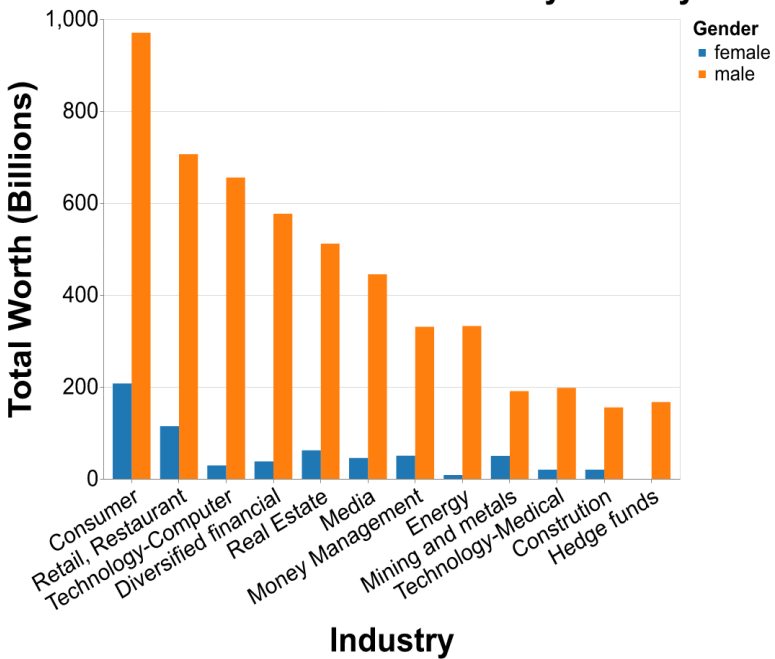

02 Consumer and financial industries dominate billionaire wealth, with females showing higher wealth concentration multiples than males.

Billionaire Worth Across Industries

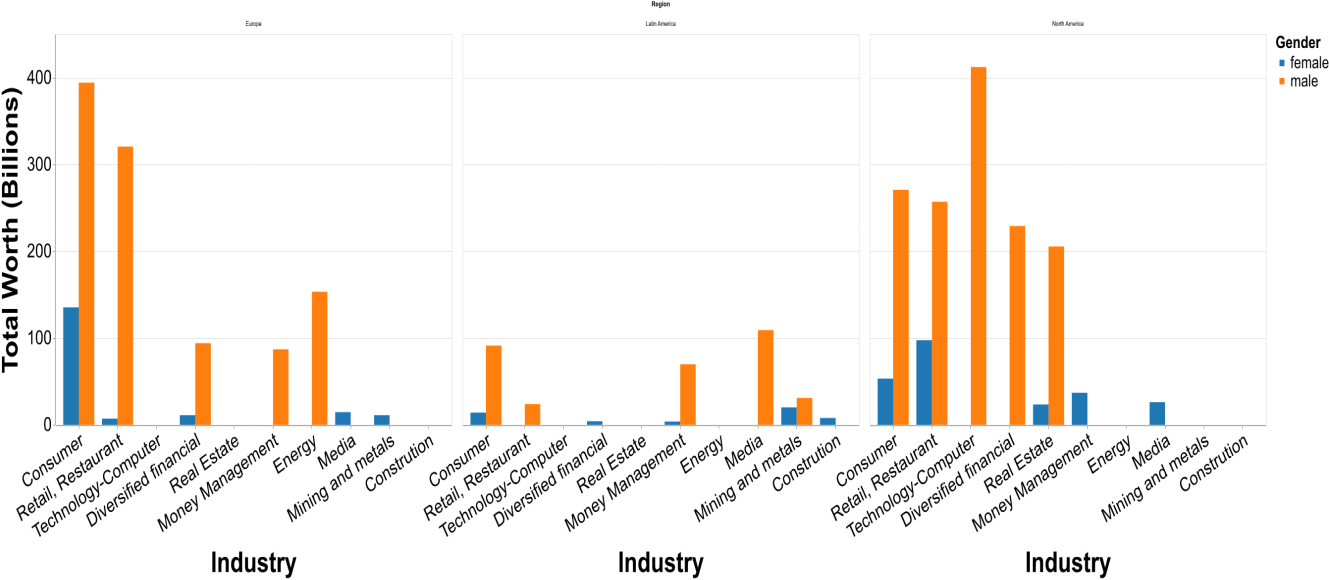

Gender Differences in Worth by Industry

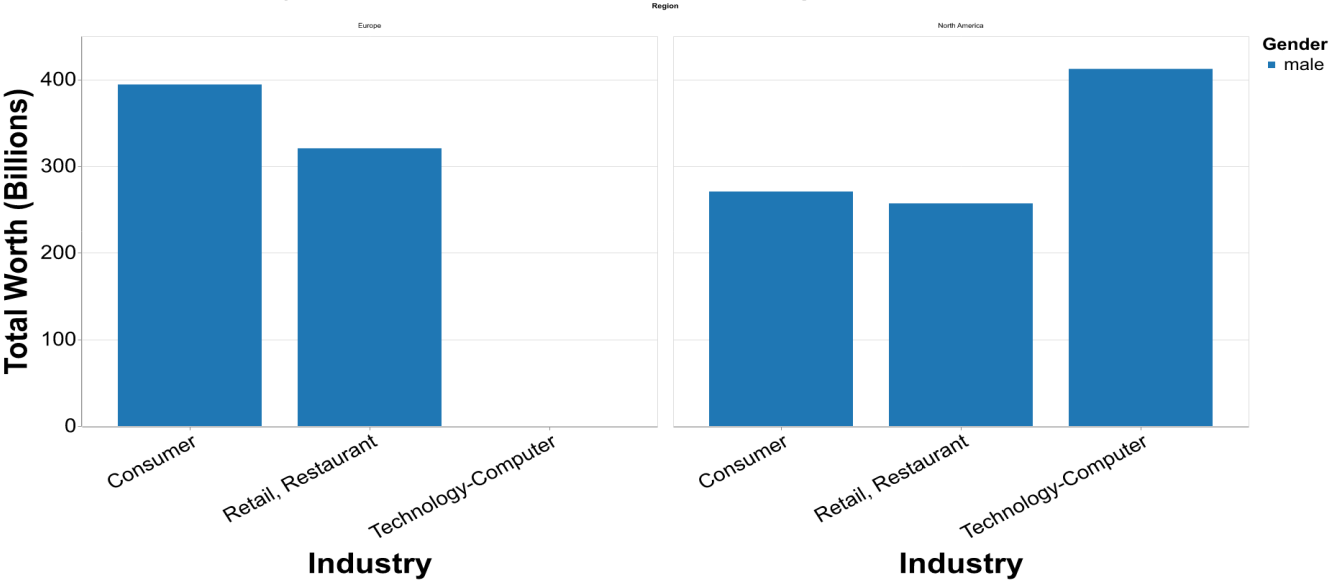

03 Top industries show strong regional and gender disparities, with males holding higher worth but females concentrating more wealth proportionally.

Billionaire Worth by Gender in Top Industries and Regions

Billionaire Worth by Gender in Top Industries and Regions

CONCLUSION

North America leads in total billionaire worth at 2342.9, nearly doubling Europe's 1674.6. Construction wealth is notably low in Sub-Saharan Africa, indicating infrastructure development challenges. This highlights stark regional disparities in wealth concentration and economic opportunity. Consumer and Technology industries dominate billionaire wealth, with Consumer topping at 1177.8. Females hold higher wealth multiples within their gender, yet males maintain larger absolute wealth, revealing persistent gender gaps. Industry wealth is heavily concentrated among few billionaires across sectors. Regions strongly influence industry wealth, with Europe and North America showing striking gender disparities in billionaire worth. Males dominate wealth totals, especially in Consumer and Technology sectors, while females hold proportionally more in top regions. This underscores regional-economic hubs and gender inequality shaping global billionaire wealth.
